NOTE—C ntin Sh t

5718/2

Conversion of Kattamakere-Tank a Garden at Hassan

The File No | of 1941 | General and Revenue Secretariat

Serial No

6) The Dy Comm^r has sanctioned an Estimate amounting to Rs 11,800/- for the Conversion of Kattamakere tank a Garden at Hassan

A sum of Rs 11000/- has been sanctioned for the work out of the Special Grant of two lakhs of rupees announced by H H in his speech

It is a point for Consideration, why the additional grant of Rs 800/- asked for, to make up the estimated Cost, should not be borne by the Hassan Town Municipality, as the amount is very small

7 It is also not known, as to what would be the Actual Cost when the work is finished, as the estimated Cost of Rs 11,800/- may have to be revised once again

8 In the event, the estimate for Rs 11800/- may be sanctioned now, the question of the extra cost being raised after the work is finally closed

Law 31/5/41

Law 31 V 41

9) The amount over and above the sanctioned amount, whatever it may be will be met by Govt from the Lakhs of rupees announced by His Highness, if any amount is available or from the Town Improvement grant of next year

Re Conversion of Kattinkere into a Garden in the Hassan Town Municipality

With reference to your letter No L 3885 dated 13th November 1941 on the above subject, I have the honour to enclose herewith a copy of letter No 553 dated 14th October 1941 of the Sanitary Engineer stating that an alternative proposal to that of the Executive Engineer Hassan Division, would reduce the filling in Kattinakere still further The alternative proposal consists of cutting a drain in the valley between the Baklespur Road and the Holanarsipur Road so as to lead the waters of Kattinakere right into the waste weir The Sanitary Engineer states that the Asst Engineer, Hassan Sub-Division has been requested to submit an estimate for all the works to be included in the alternative proposal The Sanitary Engineer is reminded this day As soon as the estimate is received it will be forwarded to Government

I have the honour to be,
Sir,
Your most obedient servant,

Director of Public Health

Letter No 553 dated 14th October 1941 from the Sanitary Engineer, Bangalore, to the Director of Public Health in Mysore, Bangalore

Regarding the draining of Kattinkere at Hassan

I have the honour to state that from the block levels taken in the bed of Kattinkere it is noticed that the average level of the bed is 42 50 the existing bed of Kumbarakere, which is situated just above Kattinkere, is 48 25, and it is ascertained from the Executive Engineer, Hassan Division, that proposals are made by him for raising the bed of Kattinkere to the same level as Kumbarkere except for a drain in the centre through which the water could be allowed to flow across

The level of the waste weir of Kattinkere is 45 25 and a discharge of 2½ to 3 ft over the waste weir seems to have been provided for in the filling of Kattinkere The level of the waste weir of Channapatna Tank into which the above tank discharges is 38 0 the drain leading the water from Kattinkere to Channapatna Tank is located below the newly constructed Police Station, and its invert is already fixed with reference to the existing weir level

The irrigation channel from the Channapatna Tank crosses the waste weir valley at a point about 500 feet below the Tank, and the level of the relieving weir located across this valley is 23 3 or about 14½ feet lower than the waste weir of Channapatna Tank So far as the draining of the Kattinkere is concerned, an alternative proposal would be to cut a drain in the valley between the Baklespur Road and the Holenarsipur Road so as to lead the waters of Kattinkere right into the above waste weir valley With this arrangement it will be possible to drain the waters of Kattinkere to a much lower point than the waste weir of the Channaptna Tank, and if this alternative is adopted, the filling in Kattinkere could be reduced further than in the above proposal made by the Executive Engineer, Hassan Division But the disadvantages of this alternative proposal are that the 1)the inflow of about 5 units coming along the Kattinkere series into the Channapatna Tank will be cut off, and this may lead to a reduction of the Achkat below the latter tank, (2) the valley between the Baklespur Road and the Holenarsipur Road through which the drain would have to be constructed is a private holding (being a garden)

and acquisition proceedings would have to be taken to acquire the land required for constructing the drain along the valley, (3) the drain would probably have to be in a cutting about 10 feet deep and this would need protection of the sides to avoid damage to the gardens through which the same would be laid, (4) the road beside the new police station building is at a level far higher than the waste weir of Kattinakere and a big culvert would have to be constructed across this in order to lead the water of Kattinakere into the new proposed drain, (5) between the road beside the police station and the road in front of the Municipal Office, some further earth work and the construction of a bucca drain would be necessary since the new drain would have to be located in a narrow lane between two existing buildings Avoiding this alignment will need acquisition of the property beside the new police station where a foundation has already been laid

The Assistant Engineer, Hassan Subdivision has been requested to take a longitudinal section of the existing ground along the centre of the valley proposed for the alternative scheme, and since this involves some jungle clearing it will take some time to complete the project He is, however, instructed to push on with the work and submit an estimate for all the works to be included in the alternative proposal as soon as possible
